EXPERIENCE

Eduncy — Frontend Developer

Apr 2025 – Sep 2026

Eduncy is an education consultancy platform providing **CRM**, admission tracking, and communication tools for education agencies.

- Build and maintain core frontend features for CRM and internal tools using Next.js, TypeScript, and Tailwind CSS, focusing on performance, accessibility, and responsive design.
 - Design and implement complex, data-driven and real-time UI flows, including chat interfaces, dynamic filters, infinite scrolling, and virtualized lists, using TanStack Query and react-window.
 - Collaborate with designers and backend engineers to translate CRM and chat requirements into scalable frontend solutions.
-

PROJECTS

- **KanbanFlow – Advanced Task Management App (In Progress)**
 - Built a feature-rich Kanban board with drag-and-drop and scalable client-side state using Zustand.
 - Focused on performance and clean architecture, including optimized rendering and structured data flow.

[Live Demo](#) | [Code](#)

- **Climatic – Real-Time Weather App**
 - Displays real-time weather using geolocation and external APIs.
 - Designed a responsive UI with Tailwind CSS & Framer Motion.
